

Blackman Class – Spring Term 2

It would be fantastic for you to show your skills and knowledge developed this year completing one of the tasks below.

Reading Eggs and Mathletics task will be set on alternate Fridays (one-week Mathletics and the next Reading Eggs) and these should be completed by the following Thursday. Obviously, children are more than welcome to use these resources at any point to earn those certificates! Children should also keep practicing their multiplication and division facts, Maths KIRFs and of course read regularly.

Please choose a task below from (you are welcome to complete more if you wish) to complete, we will look forward to displaying and celebrating all children's hard work.

Art and design	Design a map (either 2D or 3D) of your perfect city, think about the key and scale	Create a device that would help you survive a disaster, it could be an item of clothing, a filtration device or scale model of a shelter	Choose one of the stories we have read in Survivors, create your own front and back cover imagining this was a book of its own
Maths / English	Write a either a non-chronological report or an explanation text about the eye. Use the information we have learnt in science lessons as well as your own research	Carry out your own experiment involving shadows. What is the relationship between the size of a shadow and distance of the source of light? Use accurate measurements in your write up.	Consider something you are interested in, it could be an opinion, an event or an issue. Research both sides of the argument about it and write a balance argument. i.e Football or Rugby, which is better? Pop or Rap? Gaming or the Great Outdoors?
Big Questions (demonstrate your answers to these however you see fit)	What would the world be like with no light?	Day or night? Which is most important?	What actually makes the perfect friend?
